

Cybersecurity Evaluation Tool (CSET) Tool

- **CSET is a no cost application developed by the DHS's Industrial Control Systems - Cyber Emergency Response Team (ICS-CERT)**
 - The tool provides a systematic approach for evaluating an organization's security posture by guiding asset owners and operators through a step-by-step process to evaluate their industrial control system and information technology network security practices.
 - To use the assessment tool, users select one or more government and industry recognized cybersecurity standards, including NIST SP 800-171. CSET then generates questions that are specific to those requirements and presents the assessment results in both summary and detailed form.

- Download at <https://ics-cert.us-cert.gov/Downloading-and-Installing-CSET> or to request a physical copy of the software, contact cset@dhs.gov
- Select "Advanced Mode" which will provide the option to select NIST 800-171
